MIT | Academy of Engineering
(An Autonomous Institute Affiliated to Savitribai Phule Pune University)

ANIL VERMA

B.Tech. - Computer Engineering - Software Engineering

Email: 202401100015@mitaoe.ac.in
Pune, Maharashtra, India

KEY EXPERTISE

prompt engineering | AI

EDUCATION

MIT Academy of Engineering, Pune 2024 - 2028
B.Tech. - Computer Engineering - Software Engineering | CGPA: **8.01** / **10**

Government Higher Secondary School Rajpura, Samba 2024
12th | JKSBSE | Percentage: **79** / **100**

Shri Narsingh Vidya Peeth High School Rajpura, Samba 2022
10th | JKSBSE | Percentage: **94.80** / **100**

AWARDS AND SCHOLARSHIPS

- PMSSS Scholarship – Awarded under Prime Minister's Special Scholarship Scheme for academic merit

INTERNSHIPS

Cisco Networking Academy 28 May, 2025 - 28 Jul, 2025

Key Skills: Network Security | Cyber-security | AI | Firewalls | Firebase | VLAN

The internship was conducted under Cisco Networking Academy, focusing on cybersecurity and network design using Cisco Packet Tracer. It spanned 140 hours, divided into project work, structured activities, and coursework. The scope included VLAN segmentation, ACL implementation, ASA firewall configuration, VPN setup, and AAA server integration.

PROJECTS

Block-mint 01 Feb, 2025 - 15 Feb, 2026
Team Size: 3

Key Skills: AI | Javascript | CSS | HTML5

Project Link: https://block-mint.pages.dev/

Welcome to Block Mint, a modern web-based platform designed to showcase real-time cryptocurrency insights and a user-friendly digital dashboard experience. This project reflects my interest in blockchain technology, web development, and dynamic user interface design. It demonstrates my ability to build interactive web applications that display market trends, trading options, and digital asset management features in a clean and responsive layout.

Digital portfolio 28 Jan, 2025 - 25 May, 2025
Mentor: Prof. Sandeep Shrivale | **Team Size:** 1

Key Skills: HTML5 | CSS | Javascript

Project Link: https://anil-4115.github.io/Digital-Portfolio/Anil.html

I am a dedicated computer science student with a strong interest in programming, problem-solving, and continuous learning. This digital portfolio showcases my academic achievements, including certifications in Design Thinking, Simplilearn, Next Wave, and National Health programs. It highlights my technical growth, creativity, and commitment to developing practical skills. Along with my academic work, my hobbies such as reading books, playing sports and video games, painting and drawing, traveling, trekking, and listening to music reflect my balanced personality, curiosity, and enthusiasm for exploring new ideas and experiences.

Network Search like wireshark 28 Jan, 2025 - 25 May, 2025
Mentor: Prof. Sandeep Shrivale | **Team Size:** 4

Key Skills: Python | Network Packet Analysis | TC/IP Protocols

Project Link: https://drive.google.com/file/d/1HYUtjyfUsNh1m_kSliXUGDRnZfxNIzMl/view?usp=drive_link

Developed a mini project “Network Search Like Wireshark,” a basic network packet analyzer that captures and analyzes data packets flowing through a computer’s network. The system uses Python and the Scapy library to sniff live packets, extract details such as source IP, destination IP, and protocol type, and apply filters based on protocols or IP addresses. It also allows saving captured packets into files for later analysis and supports loading previously saved data. This project demonstrates practical knowledge of networking, packet analysis, and basic cybersecurity monitoring concepts.

Degraded Waters, Disrupted Ecosystems: Impact of Pollution on Aquatic Life

18 Sep, 2024 - 15 Jan, 2025

Mentor: Archana Mane | **Team Size:** 5

Project Link: https://drive.google.com/file/d/1iUiy6h8TCNxk3Ylar2hLSupBV0Xw41UW/view?usp=drive_link

This project focuses on studying the impact of pollution on aquatic life and ecosystems. It examines how different pollutants such as plastics, industrial waste, chemicals, and agricultural runoff contaminate water bodies and harm aquatic organisms like fish, coral reefs, and marine mammals. The research highlights major consequences including habitat destruction, health issues, reduced reproduction, and risk of extinction among aquatic species.

The study combines primary research (survey on public awareness and perceptions) and secondary research (analysis of pollution sources, effects, and existing solutions). It also explores how pollution disrupts biodiversity, food chains, and ecological balance, ultimately affecting human life through unsafe seafood and declining fisheries.

The project proposes practical solutions such as banning single-use plastics, increasing awareness campaigns, implementing stricter environmental regulations, and using eco-friendly technologies to monitor and reduce water pollution. Overall, the aim is to raise awareness and promote sustainable actions to protect aquatic ecosystems and ensure long-term environmental health.

ASSESSMENTS / CERTIFICATIONS

Great Learning – Linux Tutorial

Key Skills: Kali Linux | Cybersecurity Basics | Ethical Hacking Tools | Linux Environment | Penetration Testing Fundamentals

Completed an online Linux Tutorial course from Great Learning Academy, gaining foundational knowledge of Linux operating system, basic commands, file management, and command-line usage for system operations.

Kali Linux Basics

Key Skills: Kali Linux | Cyber-security | Ethical Hacking | linux environment

Successfully completed the “Introduction to Kali Linux Basics” course from Simplilearn, covering cybersecurity fundamentals, Kali Linux tools, and basic ethical hacking concepts

NxtWave – AI for Students Workshop

Key Skills: AI | machine learning introduction | Ai model understanding | Generative Ai models

Participated in an AI workshop conducted by NxtWave, learning the fundamentals of Artificial Intelligence and Generative AI models along with their applications in modern technology.

National Health – Lymphatic Filariasis Awareness Quiz

Key Skills: health awareness | social responsibility | Public health knowledge

Participated in a national awareness quiz on Lymphatic Filariasis (Elephantiasis) organized under Unnat Bharat Abhiyan to promote public health knowledge and social awareness.

Model Context Protocol: Advanced Topics

Key Skills: Model Context Protocol | AI Systems | Context Management | Advanced AI Concepts | Prompt Engineering

Completed an advanced-level course on Model Context Protocol covering context handling, structured AI communication, and advanced prompt engineering techniques for building intelligent AI systems.

Introduction to Model Context Protocol

Key Skills: AI Fundamentals | Context Protocol | Prompt Design | AI Communication

Learned the fundamentals of Model Context Protocol including how AI systems manage and utilize context effectively for improved responses.

Introduction to Claude Cowork

Key Skills: AI Collaboration | Claude AI | Workflow Automation | Productivity Tools

Explored collaborative workflows using Claude AI, focusing on improving productivity and teamwork through AI-assisted tools.

Introduction to Agent Skills

Key Skills: AI Agents | Automation | Task Execution | Intelligent Systems

Learned the basics of AI agents, their architecture, and how they perform automated tasks in intelligent systems.

Claude Code in Action

Key Skills: AI Coding | Automation | API Integration | Problem Solving

Hands-on experience in implementing AI-based coding solutions using Claude, focusing on real-world applications and automation.

Claude 101

Key Skills: AI Basics | Claude AI | AI Usage | Prompt Engineering

Introductory course covering the basics of Claude AI, including usage, capabilities, and prompt engineering fundamentals.

Claude with the Anthropic API

Key Skills: API Integration | AI Development | Backend Integration | Claude API

Learned how to integrate and use the Anthropic API to build AI-powered applications and services.

AI Fluency: Framework & Foundations

Key Skills: AI Fundamentals | Critical Thinking | AI Literacy | Ethical AI

Developed a strong foundation in AI concepts, frameworks, and responsible use of artificial intelligence.

AI Fluency for Students

Key Skills: AI Awareness | Student Productivity | AI Tools | Digital Skills

Focused on practical AI usage for students to enhance learning, productivity, and problem-solving skills.

AI Fluency for Nonprofits

Key Skills: AI for Social Impact | Nonprofit Technology | Automation | Data Use

Explored how AI can be applied in nonprofit organizations to improve efficiency, outreach, and impact.

Claude with Google Vertex AI

Key Skills: Google Vertex AI | Cloud AI Integration | API Usage | Machine Learning Deployment | AI Applications

Learned how to integrate and deploy Claude AI using Google Vertex AI, focusing on cloud-based AI solutions, model deployment, and scalable AI applications.

Claude with Amazon Bedrock

Key Skills: Amazon Bedrock | Cloud Computing | AI Integration | API Development | Scalable Systems

Gained knowledge of integrating Claude AI with Amazon Bedrock, including building scalable AI applications and working with cloud-based AI services.

EXTRA CURRICULAR ACTIVITIES

- Participated in sports activities including Volleyball and Basketball tournaments at school/college level

PERSONAL INTERESTS / HOBBIES

- Playing Volleyball, Playing Basketball, Sports and Fitness
